Brosse  
OMEGA  
WELDING COMPANY

# Brosse

The Brosse collection's warm pewter tones and soft brushed texture connect with a broad range of color palettes currently used in interior design.

The sophisticated contemporary look is achieved by a machine applied finish that provides consistency in tone and texture.

Brosse's neutral warm pewter finishes are ideal for black & white, sepia, and color photography as well as etchings, lithography, and drawings. Modern to fine art applications are also well suited by the clean geometric lines of the collection.

Two floater styles round out this collection providing framing solutions for works on canvas or floating face mounted media.

## ◁ Photo Opt

The brushed pewter produces a softness and warmth that work in harmony with hues in black & white and sepia photographic prints
