OMEGA[®]

GLOW*

Glow is a collection of five profiles showcasing a modernized gold palette. Gold has made a comeback in interior design, rebooted by softer tones and finishes such as satin gold, etched brass and champagne hues. Ornamentation is left behind for simple shapes to allow the warmth and beauty of gold to be the accent on its own. These geometric profiles, paired with the soft brilliance of the finish present many new picture framing solutions for today's market.

Glow features a 2" shadowbox moulding (84183), ideal for three-dimensional projects and Omega FloatMates. Profiles 84180 and 84182 feature rabbet depths that accommodate works on canvas, textiles, and more.
