G24

The G24 Collection shines bright, with rubbed gold leaf mouldings casting a soft luster upon four square profiles.

Designed for modern interiors, this collection adds warmth and glamour to the urban loft aesthetic, while providing balance with simple lines and its unique texture. Square profiles are ideal picture framing solutions for contemporary art and modern spaces alike, as it sets a clean stage for the artwork and harmonizes well with interior design schemes.

For shadowboxes and Floatmate framing, G24's style 84382 (1 1/4" wide, 1 3/4" rabbet) is the highlight of the group. These larger spaces call for the impact of sizable artwork that makes a statement, and this profile accommodates large canvas pieces, textiles, three-dimensional artwork and more.

The collection is consistent in shape, scale and color which is excellent for contract framing, art galleries and exhibitions, utilizing a unified look within an interior using each of G24's offerings.

Stackable Combinations

There are some attractive stacking options for G24 as well, as profile 84379 has a generous 1 3/8" rabbet height which can cap 84380 (1 1/8" tall), and 84381 (1").

G24's largest profile 84382 (shadowbox), can cover each of the other three in the collection.
